Dear cable user:

2004

We here at JML focus on two main areas in cabling:

#1) **Cable Manufacturer** - Built with copper, glass or plastic fiber optic material purchased direct from the industries best manufactures like Madison Cable(Tyco), Alcoa(AFL) Fiber Cable, AMP(Tyco) , and Amphenol.

Cable types include:

- Computer and peripheral device data interface cables
- Network interface cables
- SCSI internal and external
- Wireless antenna cables
- Analog/ Digital audio/ video cables
- Power cords(US/International), power strips, power supplies and backUPS
- CATV/ Satellite cables

Since 1980 our cables have hooked together the following system platforms:

Sperry/ Unisys, HP, IBM, SGI, Storage Technology, SUN, DEC, and Cisco.

#2) **Designer and Builder of Premise Wire Cabling Infrastructures** - Onsite cabling includes Cat 5e, Cat 6, telco, RG-58, RG-59, RG-62, RG-6, Hadix, V.35, RS-232, RS-530, RS-449, USB, PS2, BUSS & TAG, IBAG, singlemode fiber, multimode fiber and radar control.

We design, supply, and install complete telecommunication systems including racks, patch panels, and cable management. We can ground and install seismic tie downs for these racks if needed. We have configured racks with servers, switches, shelves, and KVM+ extenders (Lightwave/ LANtronics).

These premise cabling systems come complete with testing, a labeling system, with as built documentation and are supported over the life of the cable system.

My 20+ years of practical experience in this industry is literally available to you 24/7. So, call me anytime you need a cable or just advice and I will do my best to support you.

Regards,
